

Ashmore Global Opportunities Limited (AGOL)

Ashmore Global Opportunities Limited ("AGOL") is a closed ended investment company incorporated and registered in Guernsey and listed on the London Stock Exchange. AGOL's investment objective is to deploy capital in a diversified portfolio of global emerging market strategies which will be actively managed with a view to maximising total returns. This will be achieved by investing across investment themes, including special situations, external debt, local currency, equity and corporate high yield with a principal focus on special situations.

Quarterly Update of Top 5 Underlying Investments

Name	AEI	
Holding	16.15%	
Website	www.aeienergy.com	
Sector	Utilities	
Business Description & Rationale	<p>AEI is headquartered in Houston, Texas, and owns and operates over 50 companies in Argentina, Bolivia, Brazil, Chile, China, Colombia, Ecuador, El Salvador, Dominican Republic, Guatemala, Jamaica, Mexico, Nicaragua, Panama, Pakistan, Peru, Philippines, Poland, Turkey and Venezuela. The company operates through four core business segments: Natural Gas Transportation and Services, Natural Gas Distribution, Power Distribution and Power Generation.</p> <p>AEI is a company that manages, operates and owns interests in essential energy infrastructure assets in the emerging world. It is a unique global platform: others in the power space have regional businesses or are global single line e.g. generation, but none are global multi-line businesses. Over time Ashmore expects AEI to grow in Eastern Europe and Asia so that its portfolio better reflects the relative economic weights of different regions. Ashmore believes value, diversification and scale in energy are available in emerging markets, which are stable, long-term growing markets and that this will increasingly be valued by others.</p>	
Recent Events	<p>AEI continues to perform within the public guidance given to investors. AEI recently signed a transaction to acquire just over 50% of EMDERSA in Argentina, 4% of TGS and 13.5% of Luz del Sur. AEI delayed its IPO in the last week of October due to adverse equity market conditions and issued the following statement: <i>"We have decided not to proceed with an initial public offering of our shares at this time due to market conditions. We continue to see a number of attractive opportunities in owning and operating essential energy infrastructure businesses in emerging markets worldwide."</i> Please refer the AEI's website for the latest information or the website of the SEC (www.sec.gov).</p>	

Name	Petron Corporation	
Holding	7.96%	
Website	www.petron.com	
Sector	Energy	
Business Description & Rationale	<p>Petron is the largest oil refiner in the Philippines with a 180,000 bpd refinery in Bataan, representing approximately 63% of the country's total refining capacity. Petron has a network of over 1,250 service stations, the largest in the Philippines. Petron sells most of its products domestically, including gasoline, lube oils, LPG, gasoil, ethylene and industrial products.</p> <p>Following the refinery upgrade, Petron is looking to increase its utilisation rate and thereby expand profit margins as well as improve Petron's competitive positioning. The Philippine market is highly attractive: (i) it is de-regulated with retailers having been able historically to pass on higher crude prices, (ii) the country is a net importer of oil products, and (iii) the competitive landscape is stable. The Philippine market is predominantly comprised of 3 large players, Petron, Shell and Caltex. Due to its effectively captive marketing activities, Petron is more insulated from changing refining margins than other, less integrated Asian refiners.</p>	
Recent Events	<p>Petron Corporation reported a net income of PHP1.81 billion for the first six months of 2009. This is 22% lower than the PHP2.32 billion income that Petron posted for the same period in 2008, but marks a continuation of the company's recovery from its PHP3.9 billion net loss for full-year 2008. The company continued to lead the industry in the first half with a market share of 46.3%. Earlier this year, the company embarked on an aggressive retail network expansion program. Please refer to Petron's website for the latest information.</p>	

Name	Jasper	
Holding	6.53%	
Website	www.jasperinvests.com	
Sector	Energy	
Business Description & Rationale	<p>Jasper is a Singapore listed investment company which has acquired a controlling stake in Neptune Marine (www.neptune-marine.net), an Oslo-based drillship company with operations in Asia. Neptune has 2 vessels, one of which is contracted to PDVSA in Venezuela.</p> <p>Neptune Marine was in financial difficulties arising from leverage at the holding company level and also disputes between its shareholders. Jasper, together with Ashmore funds and accounts, has invested to resolve issues at the shareholder level and re-capitalise the business. In the current market for oil field services, the main objective is survival and then consolidation. Value is generated through high quality execution and being positioned in the most robust segments of drilling activity.</p>	
Recent Events	<p>The Explorer has finished its capex programme and sea-trials and was officially named on 25th September. Senior management are speaking to a number of larger operators about long-term contracts for the vessel. Until a final contract is won, the Explorer will be on a 3 month contract in India in Q1 2010. The Discoverer is undergoing minor but essential maintenance work before resuming work for PDVSA of Venezuela where the relationship is good, particularly as field production is going well.</p>

Quarterly Update of Top 5 Underlying Investments (continued)

Name Holding Website Sector	<p>Pacnet 4.81% www.pacnet.com Telecommunications</p>	
Business Description & Rationale	<p>Pacnet, headquartered in Hong Kong and Singapore, is one of the largest Asian telecoms infrastructure and network businesses for corporate customers and wholesale broadband sales.</p> <p>Pacnet was created by Ashmore through the merger of Asia Netcom, C2C and Pacific Internet. Through the combination of these businesses, Pacnet has built a genuine pan-Asian services business for corporate customers in addition to its wholesale broadband sales. The growth prospects for its services are strong and the wholesale market is now clearly recovering from massive overcapacity.</p>	
Recent Events	<p>The revenue and profit from Unity, the new transpacific Unity cable, a JV with Google, KDDI and Singtel, may start to show in the P&L before end 2010. The new trans-Pacific infrastructure will add 4.8 Tbps of capacity between Japan and the west coast of the U.S. Pacnet is exploring the possibility of an IPO, possibly in 2010. Please refer to Pacnet's website for the latest information</p>	

Name Holding Website Sector	<p>Digicable 4.40% www.digicable.in Cable TV Service provider</p>	
Business Description & Rationale	<p>Digicable was started in mid 2007 as a cable TV start up to take advantage of a very fragmented Indian cable TV market and with low digital penetration of less than 10%. Today, Digicable is one of the largest Indian Cable distribution companies with over 2,000 employees and a strong emphasis on quality of service and content. This has enabled Digicable to cater to millions of subscribers who are spread across 125 locations in 46 cities and 14 states across India in a very short span of time. With a fiber optic backbone across its networks and state-of-the-art distribution set ups, Digicable brings the digital age through Cable transforming the way viewers receive information and entertainment.</p> <p>Over time, as digitalisation increases, Digicable is expected to get an increasing share of the subscription revenues, now mostly kept by the local cable operators in an analogue world. With the deployment of next generation digital set top boxes, they will have the ability to create a large and stable value added services income stream, which will also solidify its subscriber base (video on demand, internet on TV, advertisements, etc.).</p>	
Recent Events	<p>In the last year, competition from satellite operators has intensified, resulting in digital market share gains for satellite, especially in rural areas, putting pressure on the retail price of digital set top boxes. After an expansion phase, Digicable is now in the process of consolidating its existing markets with a focus on reaching EBITDA profitability.</p>	

Monthly Commentary

As the world slowly eases itself out of recession, economic indicators continue to point towards a protracted recovery in the US and the developed world with the US Federal Reserve highlighting that interest rates would remain exceptionally low for 'an extended period.' Through the rest of the year, we believe trading activity will become quieter until the new year, but we continue to see investors increase risk overall, especially in higher beta markets with improving fundamentals and good potential for upside. In currencies, we expect to see more divergence in performance going forward and we still believe the dollar is in a structural decline with emerging market local currencies the best hedge against G3 currency weakness. Historically, the strongest performance has not been when global growth is strong, but when G7 growth has been slow, and emerging markets are clearly recovering more rapidly than developed markets and will be the driver of growth over the next few years.

In November, special situations were generally flat while emerging markets external debt, equities and local currencies all performed well over the month. However, the portfolio's performance was negatively impacted by exposure to bonds maturing on 14-Dec-09 issued by the Dubai government owned property developer Nakheel which was 2% of the portfolio at the start of the month. The bonds fell from a price of 108 to 58 over the month on the back of a surprise statement from Dubai World asking its creditors for a standstill agreement on the obligations of Nakheel. Concerns over contagion to the broader GCC countries proved to be short-lived and some of the weakness outside the directly affected credits have broadly recovered. At the time of writing, 16th December, Dubai received a US\$10 billion loan from Abu Dhabi resulting in a full repayment of the Nakheel 14-Dec-09 bond at 115.5 which includes a 6% premium as the company did not undertake an IPO during the life of the bond.

Although special situations investments were flat overall for NAV performance during the month, we continue to believe the trajectory looks positive. The 7.54% exposure to Brazilian telecom provider, GVT, has been fully exited after France's Vivendi took majority ownership of the company and this was positive for performance. AEI, which is 16% of the portfolio, continues to explore the possibility of a public listing. Pacnet, which is close to 5% of the portfolio, was flat for performance, although we remain positive into next year and the company continues to explore the possibility of an IPO. Pacnet's drivers are strong GDP growth in Asia, consolidation in the telecoms sector an increasing demand from a growing population. Jasper was slightly negative for performance primarily based on its publicly listed share price. We continue to believe in the portfolio's special situations investments which are companies that conduct the majority of their business within emerging markets where growth prospects are rebounding faster than the developed world.

DISCLOSURES

The material relating to AGOL and the underlying investments included in this report has been prepared by Ashmore Investment Management Limited ("Ashmore") and is provided for information purposes only and does not constitute an invitation or offer to subscribe for or purchase shares in AGOL.

This material is not intended to provide a sufficient basis on which to make an investment decision. Information and opinions presented in this material relating to AGOL and the underlying investments have been obtained or derived from sources believed by Ashmore to be reliable, but Ashmore makes no representation as to their accuracy or completeness. Estimated results, performance or achievements may materially differ from any actual results, performance or achievements. Except as required by applicable law, AGOL and Ashmore expressly disclaim any obligations to update or revise such estimates to reflect any change in expectations, new information, subsequent events or otherwise. All investments are subject to risk. Prospective investors are advised to seek expert legal, financial, tax and other professional advice before making any investment decisions. This document is issued by Ashmore which is authorised and regulated by the Financial Services Authority in the United Kingdom.

The information and any opinions contained in this document have been compiled in good faith, but no representation or warranty, express or implied, is made as to their accuracy, completeness or correctness. Save to the extent (if any) that exclusion of liability is prohibited by any applicable law or regulation, Ashmore, its officers, employees, representatives and agents expressly advise that they shall not be liable in any respect whatsoever for any loss or damage, whether direct, indirect, consequential or otherwise however arising (whether in negligence or otherwise) out of or in connection with the contents of or any omissions from this document. This document does not constitute and may not be relied upon as constituting any form of investment advice or inducement to invest and prospective investors are advised to ensure that they obtain appropriate independent professional advice before making any investment.

Risk Warning: An investment in AGOL carries a number of risks and uncertainties which may cause AGOL's NAV or the market value of its shares to decline significantly. The value of an investment in AGOL could move sharply down or up and in extreme circumstances, this could result in a total loss of the investment. The NAV of one share class may differ from another. AGOL invests in emerging markets, which may be more volatile and less developed than more mature markets. Emerging markets carry a number of other risks including liquidity problems; exchange rate risk; and the operational risks of investing are higher than in more developed markets.

Source Data: NAV and NAV per share data is provided by the Administrator of AGOL, Northern Trust International Fund Administration Services (Guernsey) Limited. AGOL's performance is a calculation made by Ashmore.
