Ashmore

Ashmore Global Opportunities Limited (AGOL)

Ashmore Global Opportunities Limited ("AGOL") is a closed ended investment company incorporated and registered in Guernsey and listed on the London Stock Exchange. AGOL's investment objective is to deploy capital in a diversified portfolio of global emerging market strategies which will be actively managed with a view to maximising total returns. This will be achieved by investing across investment themes, including special situations, external debt, local currency, equity and corporate debt with a principal focus on special situations.

Quarterly Update of Top 5 Underlying Investments

Name	**ETH Bioenergia**
Holding	17.1%
Website	www.eth.com
Sector	Energy - Alternate Sources
Business Description & Rationale	ETH Bioenergia, formerly Brenco - Companhia Brasileira de Energia Renovável, is a fully integrated, renewable fuels company which has initiated construction of one of Brazil's largest ethanol production platforms involving the planning, development and harvesting of sugarcane and the large scale industrial production and distribution of ethanol fuel. The investment rationale is the favourable ethanol production environment in Brazil, with an experienced labour force, a large amount of inexpensive, fertile and arable land, an ideal climate and proven technology. ETHB's competitive advantage is based on its cost-advantaged raw material supply, integrated production and strong execution. The Company is one of the few global-scale, technologically advanced producers with significant ethanol and cogeneration capacity and a strong balance sheet.
Recent Events	ETHB concluded its first harvest year after the ETH / Brenco merger in April 2010. As of March 31, 2011, ETHB reached a headcount of over 14,000, having trained and equipped 10,000 for the year's harvest. 7 of 9 mills were in operation and ramp-up. The remaining two mills are on time and expected to come online in the 2011/12 harvest year. Total sales were R$946 million and EBITDA totalled R$134 million. The pricing environment for sugar, ethanol and energy all remained strong.

Ashmore

Quarterly Update of Top 5 Underlying Investments

Name	**Digicable**
Holding	6.1%
Website	www.digicable.in
Sector	Cable TV Service provider
Business Description & Rationale	Digicable was started in mid 2007 as a cable TV start up to take advantage of a very fragmented Indian cable TV market and with low digital penetration of less than 10%. Today, Digicable is one of the largest Indian Cable distribution companies with over 2,000 employees and a strong emphasis on quality of service and content. This has enabled Digicable to cater to millions of subscribers who are spread across 125 locations in 46 cities and 14 states across India in a very short span of time. With a fibre optic backbone across its networks and state-of-the-art distribution set ups, Digicable brings the digital age through Cable transforming the way viewers receive information and entertainment. Over time, as digitalisation increases, Digicable is expected to get an increasing share of the subscription revenues, now mostly kept by the local cable operators in an analogue world. With the deployment of next generation digital set top boxes, they will have the ability to create a large and stable value added services income stream, which will also solidify its subscriber base (video on demand, internet on TV, advertisements, etc.).
Recent Events	The merger with the Reliance DTH business has been facing regulatory delays and there are now significant uncertainties as to its successful closing. For this reason, Digicable is now evaluating alternate M&A strategies as it continues to see strong merits in the consolidation of the Indian pay-TV industry and the synergies this will create. Digicable is still not cash flow break-even and requires external funding on a regular basis to sustain its daily operations and its capital expenditure requirements. Digicable is now focused on becoming self sufficient by cutting costs, shutting down loss-making operations and by growing its footprint which will allow negotiation of better terms with broadcasters and LCOs. In the coming quarter, Digicable will be deploying digital set-top boxes in key markets, further growing its digital footprint.

Name	**AEI**
Holding	6.1%
Website	www.aeienergy.com
Sector	Utilities
Business Description & Rationale	Headquartered in Houston, Texas, AEI owns and operates interests in multiple power generation assets as well as certain natural gas transportation and distribution businesses in Emerging Markets. The Company provides the energy for development through businesses in 11 Emerging Markets countries in Asia, Central America, the Caribbean, and South America and benefits from extensive local operating expertise to foster partnerships and develop opportunities. On 19th January 2011, AEI announced the beginning of a major restructuring and repositioning of the company which would result in the sale of the vast majority of its distribution assets, whilst retaining a nucleus 2.2GW of power generation capacity as a platform for future development, excess capital will be returned to shareholders. AEI agreed to sell its interests in 10 operating companies, which collectively represented approximately 80% of AEI's total assets, for $4.8 billion. Proceeds from those sales are to be used to repay debt and to fund existing greenfield projects in the AEI portfolio, with the excess to be distributed to shareholders. AEI is reorganizing around its core power generation assets and will continue its power plant development projects in Guatemala, Peru, Argentina, Chile and China. In addition, the business will pursue compelling growth opportunities with over 1,000 MW in near-term projects under development and over 2,000 MW of mid to long-term development opportunities.
Recent Events	In Q1 2011, AEI closed on the sale of seven businesses (Promigas, Calidda, ENS, ENSA, Del Sur, EDEN and EMDERSA) as well as certain financial assets in Argentina. On April 27, AEI closed on the sale of Elektro. On April 30, AEI agreed to sell it's 43% stake in Emgasud. On April 20, AEI declared a dividend distribution of $12 per share; the dividend was paid in cash in May. Please refer to the news section on the website of AEI for more detailed information, www.aeienergy.com.

Ashmore

Quarterly Update of Top 5 Underlying Investments

Name	**Pacnet**
Holding	5.1%
Website	www.pacnet.com
Sector	Telecommunications
Business Description & Rationale	Pacnet, headquartered in Hong Kong and Singapore, is one of the largest Asian telecoms infrastructure and network businesses for corporate customers and wholesale broadband sales. Pacnet was created by Ashmore through the merger of Asia Netcom, C2C and Pacific Internet. Through the combination of these businesses, Pacnet has built a genuine pan-Asian services business for corporate customers in addition to its wholesale broadband sales. The growth prospects for its services are strong and the wholesale market is now clearly recovering from massive overcapacity. The value drivers are primarily broadband growth in all its forms across Asia, plus industry consolidation.
Recent Events	Pacnet continues to work on the new business of developing Asian data centres utilising its owned landing stations. This segment is expected to start contributing meaningfully to the bottom line early next year. Pacnet is also working to expand its capabilities in the content delivery network space, which offers very attractive growth opportunities. In 2Q 2011, Pacnet performance has been affected by one-off costs related to the Japanese earthquake. Revenues and margins are expected to recover to their previous positive trend in 3Q 2011.

Name	**EMTEK**
Holding	4.7%
Website	www.emtek.co.id
Sector	Telecommunications and IT Solutions
Business Description & Rationale	Listed integrated group of companies with three main business divisions: Media, Telecommunications and IT Solutions, and Connectivity. EMTEK is a listed holding company with its main operations in commercial free-to-view TV (SCTV), mobile phone related retail (Sakalaguna), and IT services (ACA). SCTV is the main revenue and profit driver for the group. SCTV is one of the country's leading TV stations covering 240 cities and 160 million views nation-wide. In addition to its free-to-air business SCTV also holds significant spectrum real estate which could be developed or sold.
Recent Events	EMTEK announced the acquisition of 27% of IDKM, its main listed competitor. EMTEK has also launched a tender offer for the remaining shares in IDKM and this will close in mid-July. In conjunction with the post announcement increase in the share price, Ashmore funds sold approximately 10.0% of EMTEK into the market. We expect the merger to be taken well as it will consolidate the top end of the Indonesian TV market and provide SCTV's management with a second platform to improve and consolidate.

Monthly Commentary

Market Review

Global markets saw a continuation of the volatility experienced in May as European sovereign debt concerns continued to make headline news. Greece was the key talking point with significant pressure being placed on the Government to pass strong austerity measures in the face of violent public protests. That said passing the measures is one thing; to implement them is another. EU contagion risks remain with Spain, Portugal and Italy again coming on to the radar. Outside of Europe, the US has continued to struggle although recent data points such as ISM have improved. The soft pace of growth experienced in Q1 carried over to Q2. Job creation and housing still look weak with Fed chairman Bernanke saying that the "frustratingly slow" U.S. recovery warrants sustained monetary stimulus. Bernanke also said that consumer spending is being held back by an unemployment rate that rose to 9.1 percent last month, a drop in home values and tight credit. In the emerging space, the environment is quite different with a number of countries experiencing an upgrade by the major ratings agencies. Colombia's sovereign rating was upgraded by Moody's; Colombia is now rated investment grade by both Moody's and S&P. The Philippines and the Dominican Republic also received an upgrade. However, China released a set of economic data that seemed to imply that an orderly slowdown is on the cards. Weaker growth should be seen as a positive to allow a soft landing of the economy towards a more sustainable pace. Elsewhere in Asia, a number of central banks tweaked interest rates as inflation continued to remain on the agenda. India and Thailand increased rates while Indonesia held their rates static.

Performance Summary

Returns across the various underlying and directly held investments were mixed with the liquid strategies performing a lot better than special situations. In the liquid strategies such as corporate bonds and equity, performance was flat to slightly positive. Performance within the corporate debt strategies was mixed with the Local Currency Corporate debt performing marginally better. The theme was largely driven by global risk aversion and the durability of any US recovery. Corporate bonds were also compounded by contagion from three specific credits (BTAS, Sino Forest and BLT). The China Equity Fund also contributed positively to performance, albeit mildly. China A-share rebounded, deviating from most equity markets in the rest of the world in June. The market rebounded with investors beginning to expect that the recent slowdown in economic activity may lead to a more neutral policy stance or even some relaxation on existing tightening measures. Real estate exposure was flat for both funds over the month.

Special Situations

Special situations were negative over the month with ECI Telecom being the main detractor.

The equity valuation for ECI was reduced due to a mix of factors. In particular, additional short-term debt from local banks has been used to finance the initial inventory costs of new major contracts, such as BT, and to minimise stock-out events following a major destocking at ECI's suppliers post-2008. This additional working capital debt finance, taken as a precursor to the revenue resulting from it, has impacted the valuation in the short term. In addtition, in the face of the prolonged reduction of discretionary capex spend amongst ECI's customer base, and continued strength in the Israeli Shekel, the expected improvement in sales/ EBITDA performance of the company has been deferred by several quarters. In the current market, the comparative trading multiples for all telecoms hardware manufacturers have eased. Going forward, we expect the general capex cycle, as well as major contract wins such as BT, to lift ECI's trading performance and allow inventories to be invoiced and short term debts to be correspondingly reduced

Falling equity prices in Bangkok Land and Jasper Investments also contributed negatively to performance. The listed shares in Bangkok Land were down over 16% and Jasper's were down over 6% in June. Thai stock markets experienced a lot of volatility on the back of the elections. EMTEK's share price rose nearly 6% in June following the company's acquisition (27.24%) of IDKM, one of its main TV competitors, and the announcement of a tender offer for the remaining shares. EMTEK was a positive contributor for AGOL.

DISCLOSURES

The material relating to AGOL and the underlying investments included in this report has been prepared by Ashmore Investment Management Limited ("Ashmore") and is provided for information purposes only and does not constitute an invitation or offer to subscribe for or purchase shares in AGOL.

This material is not intended to provide a sufficient basis on which to make an investment decision. Information and opinions presented in this material relating to AGOL and the underlying investments have been obtained or derived from sources believed by Ashmore to be reliable, but Ashmore makes no representation as to their accuracy or completeness. Estimated results, performance or achievements may materially differ from any actual results, performance or achievements. Except as required by applicable law, AGOL and Ashmore expressly disclaim any obligations to update or revise such estimates to reflect any change in expectations, new information, subsequent events or otherwise. All investments are subject to risk. Prospective investors are advised to seek expert legal, financial, tax and other professional advice before making any investment decisions. This document is issued by Ashmore which is authorised and regulated by the Financial Services Authority in the United Kingdom.

The information and any opinions contained in this document have been compiled in good faith, but no representation or warranty, express or implied, is made as to their accuracy, completeness or correctness. Save to the extent (if any) that exclusion of liability is prohibited by any applicable law or regulation, Ashmore, its officers, employees, representatives and agents expressly advise that they shall not be liable in any respect whatsoever for any loss or damage, whether direct, indirect, consequential or otherwise however arising (whether in negligence or otherwise) out of or in connection with the contents of or any omissions from this document. This document does not constitute and may not be relied upon as constituting any form of investment advice or inducement to invest and prospective investors are advised to ensure that they obtain appropriate independent professional advice before making any investment .

COMMODITY EXCHANGE ACT: The Investment Manager is exempt, and has filings in place to that effect, from having to register as a commodity pool operator with respect to the Fund pursuant to the criteria of U.S. Commodity Futures Trading Commission ("CFTC") Regulation 4.13(a)(4) under the U.S. Commodity Exchange Act ("CEA"), since shares in the Fund are sold in private offerings only to persons the Investment Manager reasonably believes are (i) non-US investors or (ii) US investors meeting certain sophistication requirements. As a result, the Investment Manager, unlike a registered commodity pool operator, is not required by the CEA to deliver either a CFTC disclosure document or a certified annual report to Shareholders

Risk Warning: An investment in AGOL carries a number of risks and uncertainties which may cause AGOL's NAV or the market value of its shares to decline significantly. The value of an investment in AGOL could move sharply down or up and in extreme circumstances, this could result in a total loss of the investment. The NAV of one share class may differ from another. AGOL invests in emerging markets, which may be more volatile and less developed than more mature markets. Emerging markets carry a number of other risks including liquidity problems; exchange rate risk; and the operational risks of investing are higher than in more developed markets.

Source Data: NAV and NAV per share data is provided by the Administrator of AGOL, Northern Trust International Fund Administration Services (Guernsey) Limited. AGOL's performance is a calculation made by Ashmore.

PAST PERFORMANCE IS NOT A RELIABLE INDICATOR OF FUTURE RESULTS
