

Ashmore Global Opportunities Limited (AGOL)

Ashmore Global Opportunities Limited ("AGOL") is a closed ended investment company incorporated and registered in Guernsey and listed on the London Stock Exchange. AGOL's investment objective is to deploy capital in a diversified portfolio of global emerging market strategies which will be actively managed with a view to maximising total returns. This will be achieved by investing across investment themes, including special situations, external debt, local currency, equity and corporate debt with a principal focus on special situations.

NAV, net performance (includes reinvestment of any dividends paid) and data is provided for information purposes only and sourced from Northern Trust International Fund Administration Services (Guernsey) Limited. Shares in AGOL do not necessarily trade at a price equal to the prevailing NAV per Share, which may be at a discount or premium. Periods greater than one year are annualised. Please refer to additional source data on the second page of this document. Past performance is not a reliable indicator of future results.

Allocation

Allocation by Investment Theme

Investment Theme Descriptions

Real Estate Direct real estate investments in emerging markets primarily in the residential and commercial sectors.

Equity Focuses primarily on liquidity and top-down macro country selection in publicly traded equities.

External Debt Emerging markets debt with a primary focus on dollar denominated sovereign and quasi sovereign bonds.

Special Situations Bottom-up, value and event-driven strategy. Investments are mainly in corporate restructurings through distressed debt, private and public equity and equity linked securities.

Corporate Debt Corporate debt investment theme focusing on the developing corporate debt asset class in emerging markets.

Local Currency Takes advantage of the rapidly expanding local currency and local currency denominated debt market

Allocation is shown by the investment themes of the underlying funds or companies which AGOL is invested in.

Allocation by Country

Country	Holding	Industry	Holding
Brazil	19.44%	Energy-Alternate Sources	17.47%

Quarterly Update of Top 5 Underlying Investments

Name	ETH Bioenergia
Holding	17.5%
Website	www.eth.com
Sector	Energy - Alternate Sources
Business Description & Rationale	<p>ETH Bioenergia, formerly Brenco - Companhia Brasileira de Energia Renovável, is a fully integrated, renewable fuels company which has initiated construction of one of Brazil's largest ethanol production platforms involving the planning, development and harvesting of sugarcane and the large scale industrial production and distribution of ethanol fuel.</p> <p>The investment rationale is the favourable ethanol production environment in Brazil, with an experienced labour force, a large amount of inexpensive, fertile and arable land, an ideal climate and proven technology. ETHB's competitive advantage is based on its cost-advantaged raw material supply, integrated production and strong execution. The Company is one of the few global-scale, technologically advanced producers with significant ethanol and cogeneration capacity and a strong balance sheet.</p>
Recent Events	ETHB concluded its first harvest year after the ETH / Brenco merger in April 2010. As of March 31, 2011, ETHB reached a headcount of over 14,000, having trained and equipped 10,000 for the year's harvest. 7 of 9 mills were in operation and ramp-up. The remaining two mills are on time and expected to come online in the 2011/12 harvest year. Total sales were R\$946 million and EBITDA totalled R\$134 million. The pricing environment for sugar, ethanol and energy all remained strong.

Quarterly Update of Top 5 Underlying Investments

Name	Digicable
Holding	6.8%
Website	www.digicable.in
Sector	Cable TV Service provider
Business Description & Rationale	<p>Digicable was started in mid 2007 as a cable TV start up to take advantage of a very fragmented Indian cable TV market and with low digital penetration of less than 10%. Today, Digicable is one of the largest Indian Cable distribution companies with over 2,000 employees and a strong emphasis on quality of service and content. This has enabled Digicable to cater to millions of subscribers who are spread across 125 locations in 46 cities and 14 states across India in a very short span of time. With a fibre optic backbone across its networks and state-of-the-art distribution set ups, Digicable brings the digital age through Cable transforming the way viewers receive information and entertainment.</p> <p>Over time, as digitalisation increases, Digicable is expected to get an increasing share of the subscription revenues, now mostly kept by the local cable operators in an analogue world. With the deployment of next generation digital set top boxes, they will have the ability to create a large and stable value added services income stream, which will also solidify its subscriber base (video on demand, internet on TV, advertisements, etc.).</p>
Recent Events	<p>The merger with the Reliance DTH business has been facing regulatory delays and there are now significant uncertainties as to its successful closing. For this reason, Digicable is now evaluating alternate M&A strategies as it continues to see strong merits in the consolidation of the Indian pay-TV industry and the synergies this will create. Digicable is still not cash flow break-even and requires external funding on a regular basis to sustain its daily operations and its capital expenditure requirements. Digicable is now focused on becoming self sufficient by cutting costs, shutting down loss-making operations and by growing its footprint which will allow negotiation of better terms with broadcasters and LCOs. In the coming quarter, Digicable will be deploying digital set-top boxes in key markets, further growing its digital footprint.</p>

Name	AEI
Holding	6.7%
Website	www.aeienergy.com
Sector	Utilities
Business Description & Rationale	<p>Headquartered in Houston, Texas, AEI owns and operates interests in multiple power generation assets as well as certain natural gas transportation and distribution businesses in Emerging Markets. The Company provides the energy for development through businesses in 11 Emerging Markets countries in Asia, Central America, the Caribbean, and South America and benefits from extensive local operating expertise to foster partnerships and develop opportunities.</p> <p>On 19th January 2011, AEI announced the beginning of a major restructuring and repositioning of the company which would result in the sale of the vast majority of its distribution assets, whilst retaining a nucleus 2.2GW of power generation capacity as a platform for future development, excess capital will be returned to shareholders. AEI agreed to sell its interests in 10 operating companies, which collectively represented approximately 80% of AEI's total assets, for \$4.8 billion. Proceeds from those sales are to be used to repay debt and to fund existing greenfield projects in the AEI portfolio, with the excess to be distributed to shareholders.</p> <p>AEI is reorganizing around its core power generation assets and will continue its power plant development projects in Guatemala, Peru, Argentina, Chile and China. In addition, the business will pursue compelling growth opportunities with over 1,000 MW in near-term projects under development and over 2,000 MW of mid to long-term development opportunities.</p>
Recent Events	<p>In Q1 2011, AEI closed on the sale of seven businesses (Promigas, Calidda, ENS, ENSA, Del Sur, EDEN and EMDERSA) as well as certain financial assets in Argentina. On April 27, AEI closed on the sale of Elektro. On April 30, AEI agreed to sell its 43% stake in Emgasud. On April 20, AEI declared a dividend distribution of \$12 per share; the dividend was paid in cash in May. Please refer to the news section on the website of AEI for more detailed information, www.aeienergy.com.</p>

Quarterly Update of Top 5 Underlying Investments

Name	Pacnet
Holding	5.5%
Website	www.pacnet.com
Sector	Telecommunications
Business Description & Rationale	<p>Pacnet, headquartered in Hong Kong and Singapore, is one of the largest Asian telecoms infrastructure and network businesses for corporate customers and wholesale broadband sales.</p> <p>Pacnet was created by Ashmore through the merger of Asia Netcom, C2C and Pacific Internet. Through the combination of these businesses, Pacnet has built a genuine pan-Asian services business for corporate customers in addition to its wholesale broadband sales. The growth prospects for its services are strong and the wholesale market is now clearly recovering from massive overcapacity. The value drivers are primarily broadband growth in all its forms across Asia, plus industry consolidation.</p>
Recent Events	<p>Pacnet continues to work on the new business of developing Asian data centres utilising its owned landing stations. This segment is expected to start contributing meaningfully to the bottom line early next year. Pacnet is also working to expand its capabilities in the content delivery network space, which offers very attractive growth opportunities. In 2Q 2011, Pacnet performance has been affected by one-off costs related to the Japanese earthquake. Revenues and margins are expected to recover to their previous positive trend in 3Q 2011.</p>

Name	Alphaland
Holding	5.0%
Website	www.alphaland.com.ph
Sector	Real Estate
Business Description & Rationale	<p>High end commercial and high & mid-market residential development in Manila.</p> <p>The company focuses on acquiring and developing prime but undeveloped sites into Class A office and residential locations. The company has two main areas of focus: Metro Manila for office and residential development and resort & second home developments on islands near Manila (both of which feed into the same middle-to-high income bracket customer segments). Limited supply of Class A residential and commercial space in Metro Manila and growing Philippine income driving that demand.</p>
Recent Events	<p>No major events this quarter – management focussed on development of existing projects as per the business plan.</p>

Market Review

Global financial markets experienced a severe bout of volatility in August with weak US data and re-emerging sovereign debt concerns in the G10 dominating global markets. US payroll data for August was weak, with downward revisions to June and July numbers, a shorter working week and a fall in hourly earnings. Consumer confidence tumbled to the lowest level since April 2009 while the ISM index was essentially flat. Investors are now seriously asking questions about the likelihood of the US slipping back into recession. Our view is that a US recession is unlikely, but that does not mean to say that it will avoid slow growth in the coming years. Eurozone GDP grew 0.2% q-on-q in Q2, slightly below expectations, and with a significant drop from Q1 growth (0.8%). Yields on Spanish and Italian bonds increased, while both Italy and Portugal passed emergency austerity measures aimed at bringing their fiscal deficits under control. Data from Emerging Market countries continues to be broadly positive with many countries continuing to post upward GDP growth, and some now showing falling inflation rates.

Performance Summary

Performance amongst the Emerging Market asset classes was very mixed with public equities and high yield corporate bonds coming off particularly worse. External debt was positive while local currency debt was flat to slightly positive. That said, our view is that the sell off in equities and corporate bonds does not reflect; a) the fundamentals within the underlying companies and b) the fundamentals and growth prospects of the Emerging Market countries. Rather, the negative performance has been a function of overall market sentiment, primarily driven by the lack of G10 growth and European sovereign debt concerns. Out of the liquid strategies, Emerging Market Local Currency Corporates was the biggest detractor to performance. Overall August was a difficult month for corporate credit. At first this was a follow-through of the concerns held by the equity markets over the outlook for global growth, although certain company-specific concerns added to the problem later on. In spread terms however, most of the damage was done in the first nine days of the month. China, Kazakhstan and Mexico were the three poorest performers, with Qatar, UAE and Malaysia showing positive returns for the month. Investment Grade corporate bonds outperformed high yield corporates over the month. Local currencies across the board were also negative with investors diving for the (perceived) safe haven of the US Dollar.

Special Situations

The special situations theme was negative for performance overall. While there were no events or revaluations to speak of in August, most of the negative performance stemmed from the listed share prices of investee companies falling sharply (in line with overall Emerging Market equities). ISM Communications Corp announced that it had completed the acquisition of majority shares in Philippine Bank of Communications (PBCom.). However, ISM saw its share price slide by 25% in August. Japer Investments announced a \$10m loss for the 3 months ending 30/06/2011. However, the Explorer vessel begun its drilling contract with AGR Well Management in the Republic of Guinea. Jasper's shares fell by around 21% in August. It is worth noting however, that the ISM and Jasper stock has limited free float. As we have noted before, performance of the public markets has an affect on the valuation of Emerging Market special situations assets, but which will often, be unrepresentative of the underlying fundamentals (in EM countries and EM companies) realised upon final exit.

DISCLOSURES

The material relating to AGOL and the underlying investments included in this report has been prepared by Ashmore Investment Management Limited ("Ashmore") and is provided for information purposes only and does not constitute an invitation or offer to subscribe for or purchase shares in AGOL.

This material is not intended to provide a sufficient basis on which to make an investment decision. Information and opinions presented in this material relating to AGOL and the underlying investments have been obtained or derived from sources believed by Ashmore to be reliable, but Ashmore makes no representation as to their accuracy or completeness. Estimated results, performance or achievements may materially differ from any actual results, performance or achievements. Except as required by applicable law, AGOL and Ashmore expressly disclaim any obligations to update or revise such estimates to reflect any change in expectations, new information, subsequent events or otherwise. All investments are subject to risk. Prospective investors are advised to seek expert legal, financial, tax and other professional advice before making any investment decisions. This document is issued by Ashmore which is authorised and regulated by the Financial Services Authority in the United Kingdom.

The information and any opinions contained in this document have been compiled in good faith, but no representation or warranty, express or implied, is made as to their accuracy, completeness or correctness. Save to the extent (if any) that exclusion of liability is prohibited by any applicable law or regulation, Ashmore, its officers, employees, representatives and agents expressly advise that they shall not be liable in any respect whatsoever for any loss or damage, whether direct, indirect, consequential or otherwise however arising (whether in negligence or otherwise) out of or in connection with the contents of or any omissions from this document. This document does not constitute and may not be relied upon as constituting any form of investment advice or inducement to invest and prospective investors are advised to ensure that they obtain appropriate independent professional advice before making any investment.

COMMODITY EXCHANGE ACT: The Investment Manager is exempt, and has filings in place to that effect, from having to register as a commodity pool operator with respect to the Fund pursuant to the criteria of U.S. Commodity Futures Trading Commission ("CFTC") Regulation 4.13(a)(4) under the U.S. Commodity Exchange Act ("CEA"), since shares in the Fund are sold in private offerings only to persons the Investment Manager reasonably believes are (i) non-US investors or (ii) US investors meeting certain sophistication requirements. As a result, the Investment Manager, unlike a registered commodity pool operator, is not required by the CEA to deliver either a CFTC disclosure document or a certified annual report to Shareholders.

Risk Warning: An investment in AGOL carries a number of risks and uncertainties which may cause AGOL's NAV or the market value of its shares to decline significantly. The value of an investment in AGOL could move sharply down or up and in extreme circumstances, this could result in a total loss of the investment. The NAV of one share class may differ from another. AGOL invests in emerging markets, which may be more volatile and less developed than more mature markets. Emerging markets carry a number of other risks including liquidity problems; exchange rate risk; and the operational risks of investing are higher than in more developed markets.

Source Data: NAV and NAV per share data is provided by the Administrator of AGOL, Northern Trust International Fund Administration Services (Guernsey) Limited. AGOL's performance is a calculation made by Ashmore.

PAST PERFORMANCE IS NOT A RELIABLE INDICATOR OF FUTURE RESULTS
